Fishing tips

Inspect your rod

Is your fishing rod in good condition? Maintain your reel, check the line, its tension as well as the presence of knots or a damaged section. By sliding it between your fingers, you can check whether a section has been weakened or damaged by friction. Several experts advise to change it annually. Also, check the strength of the knots that ties the lures and hooks.

Summer

- The hotter, look for depths
- Bottom line fishing (fishing jigs)
- Start early in the day

Autumn

- Spin fishing
- Trolling fishing
- Fly fishing

Winter

- Test different depths
- Use the maximum number of lines allowed
- Use of a jigging rod

Spring

- Spin fishing
- Trolling fishing
- Fly fishing
